

International Semester Exchange Program Opportunity Offered by Air University

CHINA

Introduction:

Every year Air University extends a unique opportunity to its students through a semester exchange program in China. This initiative is designed not only to facilitate students in broadening their academic horizons but also to enrich their cultural and international experiences. Air University has signed student exchange agreements with top universities in China.

Before going to the semester exchange program, students are required to freeze their semester at Air University. Upon successful completion of the program, students' grades are transferred to Air University before the start of the new semester. The minimum criteria for grades transfer is B grade and above. Any grade below B will not be transferred. Furthermore, students are facilitated by Air University through out their study period in China.

*Please note that students selected for exchange program in China will have to bear their on Visa and Airfare cost

*NPU offers merit-based scholarships to only Masters exchange students, NOT for undergraduate students.

International Semester Exchange Program Opportunity Offered by Air University

NPU does not offer any scholarship for undergraduate students, however, you are not required to pay their tuition fee for a semester. Students should be able to afford all the other expenses.

Masters:

Outstanding student visiting scholarship is available based on merit which will cover following costs:

- Tuition
- Medical Insurance
- Accommodation
- Living allowance for Masters: 2000 CNY per month

This scholarship is only for AU students, not for non-partner institutes. Professors at NPU will conduct an interview of each student. If the student passes the interview, only then he will get the scholarship otherwise he or she will have to bear his or her own expenses.

TESTIMONIALS

	<p>Izza Khushbakht BS English</p> <p>“I spent an inspirational and informative month in Beijing, China for BEIHANG University International Summer School. The stay in China bought me a lot of international friends and amazing experiences. It also gave me an experience of living abroad and taught me to communicate effectively and react rightly according to the situation. My grip and understanding on linguistics and Chinese language, the two courses I took up has increased owing to the summer school. I will never settle now. I would always be in search of greater opportunities. Very few experiences tend to have that much of an impact.”</p>
	<p>Muhammad Taaha bin Shuaib BE Mechatronics Engineering</p> <p>“I am proud to say that I was a part of International Summer School at Beihang University. The best thing about the summer school was meeting international students in a foreign country. You get to meet so many people from so many different countries, each having their own style of living and their own set of ideas about everything. You get to interact with them and understand how they study and live back in their own country. Apart from students, teachers in BUAA were extraordinary as well.”</p>
	<p>Osama Ali BE Mechanical Engineering</p> <p>“I loved my study experience at BUAA, because it’s a highly intellectually stimulating environment with so many opportunities to take advantage of during your studies. I’ve met some wonderful people (that I know will be my friends for life) and have had the chance to do so many things that I wouldn’t have otherwise, all while receiving top quality teaching. The moment you step into a BUAA university, you will feel you have entered a fairy tale. It is mesmerizing and the student facilities are outstanding. All the modern and unique features of Chinese universities enable you to engage in ground-breaking research and experience top quality teaching and learning.”</p>
